# GD > Post Address

🕒 1 min read

Last Updated: 🕒 4 months ago

🔗

✔️ All Widgets come as Widgets, Shortcodes or Blocks. Learn more about our [Super Duper Widgets](#).

The ***Post Address*** widget gives you granular control over outputting the listing address.

📘 The **GD > Post Meta widget** can output the full address, the **GD > Post Address** widget is generally needed when a partial or custom format address is required.

## Widget Options

📘 Some settings for this widget are advanced settings, reveal them by clicking the button next to save.

• **Title** – The widget title.

• **Post ID** – Enter a specific post ID or leave blank to use the current post ID.

• **Show** – What to show in the output, options are;

◦ icon + label + value

◦ icon + value

◦ label + value

◦ label

◦ value

• **Address template** – Here you can specify a custom address output template.

◦ Enter the address tags as required, adding `_c` (comma) `_br` (line break) or `_brc` (comma with break) to the tag adds a line break or comma and line break after it.

◦ Available tags: `%%street%%` `%%street2%%` `%%neighbourhood%%` `%%city%%` `%%region%%` `%%country%%` `%%zip%%` `%%latitude%%` `%%longitude%%` `%%post_title%%` `%%br%%` `%%` )

◦ Address template is an option in the widget that looks like this

Address template: ?

%%street\_br%% %%neighbourhood\_br%% %%city\_br%% %%region\_I

• **Alignment** – How the item should be positioned on the page.

• **Text Align** – How the text should be aligned.

• **Hide item on view** – This option can hide the whole output when viewed in a post loop grid view on under.

• **Hide secondary info on view** – You can set at what view the secondary info such as label will become hidden when this is used in the post loop archive item template.

## Example Output

Default output:

📍 Address: 2045 Spruce St  
Philadelphia  
Pennsylvania  
19103  
United States

If you are creating a local directory you might not want to output so much info, in this case, we could only show the icon and value and change the **Address template** to `%%street_brc%%` `%%city%%` `%%zip%%`

📍 2045 Spruce St,  
Philadelphia 19103

### Additional Display Modifiers

For address parts you can also add modifiers like `%%region_c%%`, like `%%region_br%%`, like `%%region_brc%%`

`_c` – if the value is output, add a comma after it.

`_br` – add a line break (new line)

`_c` – if the value is output, add a line after it.

`_brc` – if the value is output, add a line break and comma after it.
