# How does the GeoDirectory Search work

🕒 1 min read

Last Updated: 🕒 4 months ago

i

GeoDirectory has its own **Search** function.

## The default GeoDirectory Search

The basic Search function of the GeoDirectory Core plugin has 2 options:

- 1

The “**Search for**” field will **check the titles, description and taxonomies (tags and categories)** of the listings.  
The results will be listed in order of relevance depending on the keyword(s) entered.
- 2

The “**Near**” field will look up the coordinates of the location you enter, and return results based on the search radius you have set at **GeoDirectory > Settings > General tab > Search sub-tab > Search near radius**.

🔍 Search for

1

📍 Near

2

Search

## Examples

### Search for “hotel” anywhere

1 Search:

hotel

Near

Q

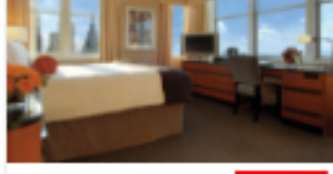

2 Results:

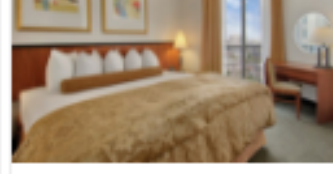

Chestnut Hill Hotel

Doubletree Hotel Philad...

Loews Philadelphia Hotel

Best Western Center Cit...

Courtyard Philadelphia ...
