How to Setup Pay to Claim Listings?

⌚ 1 min read Last Updated: ⌚ 4 months ago

You can use **Claim Listings** extension alongside **Pricing Manager** to set up “Pay to Claim” listings.

You need to have the [Claim Listings](#) and [Pricing Manager](#) extensions installed and activated in order to access these settings.

How it Works?

The general rule of thumb here is to create two packages, the first being the one with lesser features, say Package A. Thereafter, you can create a new package with additional features, say Package B.

Now, in Package A, you may simply set Package B as the package of choice for the **Claim Listings Settings** value.

Setting up “Pay to Claim” Listings

- 1 Head to **CPT > Settings > Packages**.

Name	Price	Life Time
Free Place	Free	Unlimited
Paid Plan	Free	Unlimited x∞

- 2 Click **Edit** for the Package that you wish to edit.

Name	Price	Life Time
Free Place	Free	Unlimited
Paid Plan	Free	Unlimited x∞

- 3 You will need to click “Show Advanced” button, and then scroll down to **Claim Listings**. This is where you can select the package that needs to be selected when claiming listings.

Is Default? Tick to use as a default package.

Display Order 1

Downgrade to Expire

Paid Listing Status Default (Published)

Is Active? Tick to active this package.

Claim Listing

Claim Packages Select Package

Save changes

To create “Pay to Claim” listings, it is advisable to select the higher-end package as a paid package.

Now, whenever your visitors attempt to claim a listing, they will need to select the paid package specified in **Claim Listings**.
