

# Create an “Add Listing” Page

⌚ 1 min read    Last Updated: ⌚

3 months ago

GeoDirectory allows you to create a separate **Add Listing** page for each CPT.

## Creating the “Add Listing” Page

- 1 Go to **Pages > Add New.**
- 2 Create a new page. You can fill it up with any content that you deem necessary for that particular CPT.
- 3 Paste the following shortcodes in the page content:

[Plain text](#)

[Copy](#)

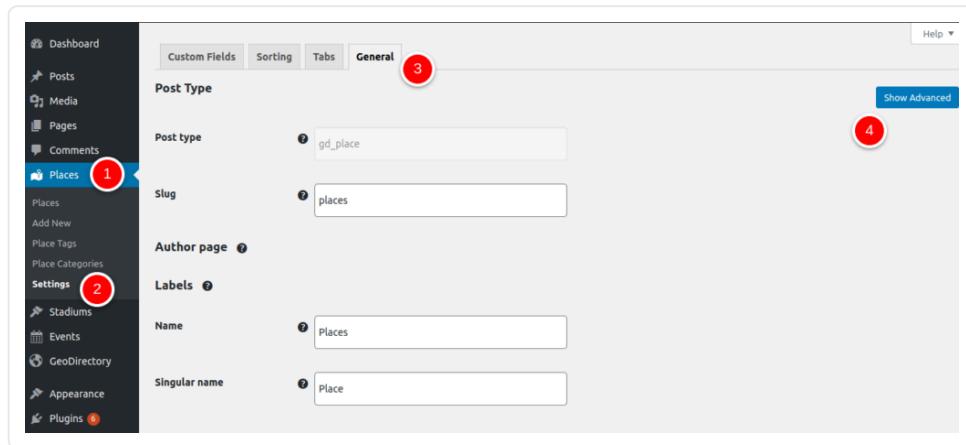

```
[gd_notifications]  
[gd_add_listing show_login=1]  
[gd_add_listing show_login=1]
```

- 4 Publish your new page.

# Setting the New Page as “Add Listing” Page

- 1 Head to **CPT > Settings > General > Add Listing**. Click the “**Show Advanced**” button (learn about **Hidden Advanced Settings**).

- 2 Under **Template Page Settings** section, choose the new page you just created as the **Add Listing Page**.

**Template Page Settings** ?

<b>Add listing page</b>	?	Default (Add Listing)
<b>Details Page</b>	?	Default (GD Details)
<b>Archive page</b>	?	Default (GD Archive)
<b>Archive item page</b>	?	Default (GD Archive Item)

**Link Posts Settings**

<b>Fill data for fields</b>	?	x Address   x Phone   x Email   x Website x Twitter   x Facebook
-----------------------------	---	---

3 Save your settings.
