# GD > Output Location

⌚ 1 min read Last Updated: ⌚ 4 months ago

On this page

[Widget Options](#)[Example Output](#)

💡 All Widgets come as Widgets, Shortcodes or Blocks. Learn more about our [Super Duper Widgets](#).

The **Output Location** widget is a quick way to **output several custom fields in a specific location**.

The way it works is, in the add/edit custom fields page, when you open a custom field you can set it to “**Show in extra output location**”. This widget will output the data for that location.

💡 You can also add custom fields individually to most locations with the **GD > Post Meta** widget.

## Widget Options

- **Location** – The location type to output. By default these are; **Details page sidebar**, **Listings page** and **Map bubble**.

## Example Output

💡 Under Custom fields settings; **Places > Settings > Custom Fields**. Set the fields you want to show, and where.

The screenshot shows the 'Custom Fields' settings page. A 'Phone' field is selected. The 'Show in extra output location' checkbox is checked, and the 'Details page sidebar' and 'Map bubble' options are selected. Other settings like 'Field label', 'Field description', and 'Is active' are also visible.

💡 The **map bubble** and the **listings items page** come set as default, in some cases, you may need to add the widget to the sidebar for the details page.

The screenshot shows the 'Sidebar' settings page. The 'GD > Output Location' section is selected. The 'Location' dropdown is set to 'Details page sidebar'. Other settings like 'Show / Hide Options' and 'GD Pages' are also visible.

💡 In the details page sidebar, you will now see the fields you selected.

The screenshot shows the 'Details page sidebar' output. It displays various custom field values such as 'Tags: America', 'Category: Food Nightlife and Restaurants', 'Address: 123 Philadelphia, Pennsylvania, United States', 'Phone: (000) 111-2222', 'Email: info@buddakan.com', 'Website', 'Twitter', 'Facebook', and 'Open now: 1:00 pm - 10:00 pm'.

Also in the map bubble, you will see the fields:
