# GD > Location Description

⌚ 1 min read Last Updated: ⌚ 4 months ago

All Widgets come as Widgets, Shortcodes or Blocks. Learn more about our [Super Duper Widgets](#).

The **Location Description widget** displays the current location's description to the user. It can be used to show a custom description for a location page.

This description is not to be confused with meta description.

## How to Set Location Description?

You can set the **Location Description** when adding a new location. Alternatively, for existing locations, you can choose to edit them and add descriptions therein.

### Suggested Reading:

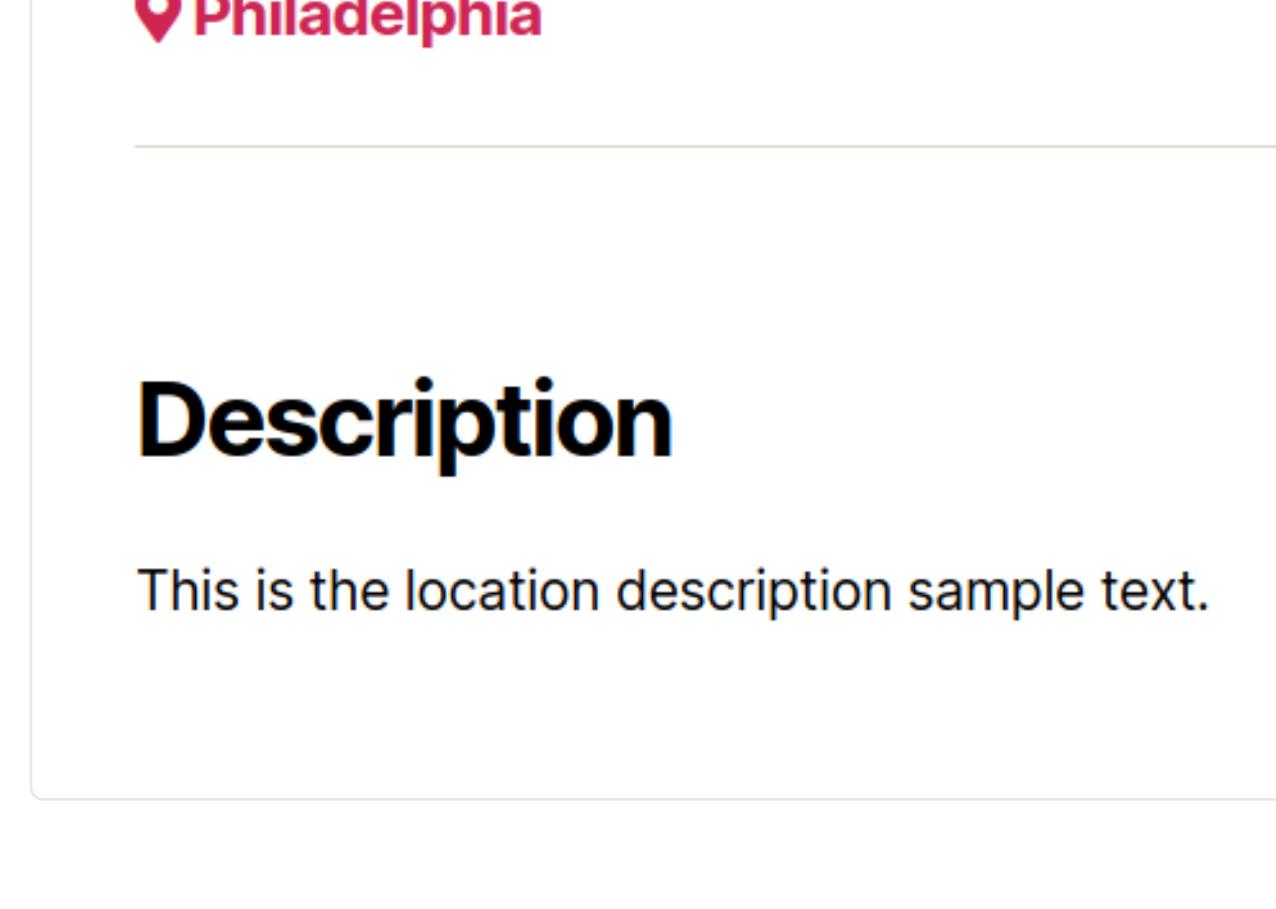

- [How to Add a New Location?](#)
- [Settings Overview for Locations > Add Location](#)

## Widget Options

- Title – The title for the widget.

## Example Output

Default output, showing the currently active location's description on the frontend:
